

ASSIGNMENT NO: 05

Problem Statement: MINIPROJECT- Design and Develop an Custom Application on Salesforce

Project Name: - Student Feedback Management System (Salesforce App)

Title: Design and develop custom Application (Mini Project) using Salesforce Cloud.

Step-1: Click on Lightning Experience

Step-2: Click on Setup and select Setup for current App.

Step-3:

Click on Create an Object

So, Click on Object Manager Tab next to Home Tab

Click on Create –Custom Object

Step-4: Create Custom Object

Go to Object Manager

Click Create → Custom Object

Label → Student

Plural → Students

Record Name → Student Name

Data Type → Text

✓ Tick: Allow Reports

👉 Click Save

Custom Object Information Required Information

The singular and plural labels are used in tabs, page layouts, and reports. Be careful when changing the name or label as it may affect existing integrations and merge templates.

Label Student Example: Account

Plural Label Students Example: Accounts

Starts with vowel sound ☐

The Object Name is used when referencing the object via the API.

Object Name Student Example: Account

Description

Context-Sensitive Help Setting ☒ Open the standard Salesforce.com Help & Training window ☐ Open a window using a Visualforce page

Content Name --None--

Step-5: Add Fields to Student

Go to Fields & Relationships → New Create:

➤ Age

Type: Number

➤ Email

Type: Email

➤ Course

Type: Text

Click Save after each

Field Label Age

Please enter the length of the number and the number of decimal places. For example, a number with a length of 8 and 2 decimal places can accept values up to "12345678.90".

Length 18 Decimal Places 0

Number of digits to the left of the decimal point Number of digits to the right of the decimal point

Field Name Age

Description

Help Text

Required ☐ Always require a value in this field in order to save a record

Unique ☐ Do not allow duplicate values

External ID ☐ Set this field as the unique record identifier from an external system

AI Prediction ☐ Use this field to store AI prediction scores

Auto add to custom report type ☒ Add this field to existing custom report types that contain this entity

Default Value Show Formula Editor

Use formula syntax. Enclose text and variable value API names in double quotes (""). Include numbers without quotes (25). Show percentages as decimals (0.10), and express date calculations in the standard format: {Today} + 7). To reference a field from a Custom Metadata type record use: \$CustomMetadata.Type__notRecordAPIName.Field__c

Einstein

Step-6: Create “Feedback”

Object Manager → Create → Custom Object

Label → Feedback

Plural → Feedbacks

Record Name → Feedback Name

Type → Text

✓ Allow Reports

👉 Click-Next-Next-Save

The screenshot shows the Salesforce Object Manager interface in the 'Developer Edition'. The breadcrumb trail is 'SETUP > OBJECT MANAGER'. The main heading is 'Feedback'. On the left, a sidebar lists various configuration options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Object Access, Triggers, and Flow Triggers. The 'Details' section is active, showing the 'Custom Object Definition Edit' form. The form includes fields for 'Label' (Feedback), 'Plural Label' (Feedbacks), 'Object Name' (Feedback), and 'Description'. It also has checkboxes for 'Starts with vowel sound' and 'Context-Sensitive Help Setting'. At the bottom, there is a section for 'Enter Record Name Label and Format'.

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports. Be careful when changing the name or label as it may affect existing integrations and merge templates.

Label Feedback Example: Account

Plural Label Feedbacks Example: Accounts

Starts with vowel sound ☐

The Object Name is used when referencing the object via the API.

Object Name Feedback Example: Account

Description

Context-Sensitive Help Setting ☒ Open the standard Salesforce.com Help & Training window ☐ Open a window using a Visualforce page

Content Name --None--

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name Feedback Name Example: Account Name

Step-7: Add Fields to Feedback

Create:

➤ Comment

Type: Long Text Area

➤ Rating

Type: Number (1–5)

Similar to students fields and labels

Field Label: **Age**

Please enter the length of the number and the number of decimal places. For example, a number with a length of 8 and 2 decimal places can accept values up to "12345678.90".

Length: **18** Decimal Places: **0**

Number of digits to the left of the decimal point

Number of digits to the right of the decimal point

Field Name: **Age**

Description:

Help Text:

Required: ☐ Always require a value in this field in order to save a record

Unique: ☐ Do not allow duplicate values

External ID: ☐ Set this field as the unique record identifier from an external system

AI Prediction: ☐ Use this field to store AI prediction scores

Auto add to custom report type: ☒ Add this field to existing custom report types that contain this entity

Default Value: **Show Formula Editor**

Use formula syntax. Enclose text and picklist value API names in double quotes ("the field"). Include numbers without quotes (25). Show percentages as decimals (0.10), and express date calculations in the standard format, (today) + 7). To reference a field from a custom metadata type record use \$CustomMetadataType__myRecordNameField_c

Einstein

Step-8: Create Relationship

👉 This connects Feedback to Student
In Feedback → Fields → New
Select Lookup Relationship
Choose Student
Save

👉 Now each feedback is linked to a student

Compact Layouts

Field Sets

☐ Formula

☐ Roll-Up Summary

☒ **Lookup Relationship**

☐ Master-Detail Relationship

☐ External Lookup Relationship

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Step 9: Create Tabs

Setup → Search Tabs

Click New

Create:

Student Tab

Feedback Tab

Choose any icons → Save

Step 10: Create App

Go to App Manager

Click New Lightning App

Fill:

App Name → Student Feedback App

Click Next → Next

📁 Add:

Student

Feedback

Click Next → Save & Finish

**Select System Administrator
Save**

New Lightning App
